

Corning® Centrifuge Bottles

CORNING

Corning centrifuge bottles are designed for large volume processing in cell harvesting, pelleting, and protein purification. Their construction and design enable researchers to decrease the number of centrifugation cycles, improve laboratory efficiency, and boost productivity.

Superior Selection

- ▶ Available in 250 mL and 500 mL sizes
- ▶ Polypropylene and polycarbonate
- ▶ Two cap styles: standard and high performance with silicone O-ring (Note: Caps are not interchangeable among different material/size bottles.)

Ease of Use

- ▶ Specially designed cap with a built-in easy grip feature
- ▶ Wide-mouth bottle design for improved liquid handling
- ▶ Bottles are compatible with most centrifuges, and do not require special buckets

Reliable Quality

- ▶ Extra-thick walls for durability
- ▶ Leak-free processing at maximum rated speeds. (Fill volume should not exceed 80% of total bottle capacity. For volumes that exceed 80% of the total bottle capacity, Corning recommends using a larger vessel.)
- ▶ Polypropylene tubes are autoclavable at 121°C, 15 psi for 20 minutes

At Corning, we continuously strive towards improving efficiencies and developing new products and technologies for life science researchers. We have scientists working in Corning R&D labs across the globe, doing what you do every day. Our technical experts understand your challenges and your increased need for high-quality products.

It is this expertise, plus a 160-year legacy of Corning innovation and manufacturing excellence, that puts us in a unique position to be able to offer a beginning-to-end portfolio of high-quality, reliable life sciences consumables.

For additional product or technical information, visit www.corning.com/lifesciences or call 800.492.1110. Customers outside the United States, call +1.978.442.2200 or contact your local Corning sales office.
