

CUSTOMISE YOUR CABINET WITH FASTER

One of the major benefits of Faster Cabinets is the ability to customise units to suit your specific application! We can work with you to develop a device which is perfect for your requirements.

Modifications can include:

- Docking port
- Upgrade to LED lighting (SafeFAST Premium with LED lighting as standard)
- Large aperture for oversized vessels
- Heated work surface
- Integrated microscope
- Integrated microscope light
- Isokinetic head
- Custom external/internal dimensions of the cabinet
- Adjustable sash working height
- Joined cabinets, to offer an increased working area
- Entirely stainless-steel cabinets
- CCTV integration
- and many more...

WHY CHOOSE CUSTOMISATION OVER NEW EQUIPMENT?

There are many reasons for choosing a customised piece of equipment for your laboratory.

Save Money

By choosing to customise some of your existing items, you will save money which can be allocated to additional equipment for the lab, and get the most out of your budget.

Maximise efficiency

By choosing to customise a microbiological safety cabinet for your lab you can create a cabinet that works specifically for your needs and find that it fulfils its purpose more effectively than a ready-made cabinet, that is not made to measure to your exact requirements.

Reduce the environmental impact

By getting your existing equipment re-sized or re-purposed, it will allow you to reduce your impact on the environment as well as reduce your spending. Re-purposing old equipment helps to reduce waste and can also be adapted to be more clean and green in line with your organisation's policies.

Save space

Customising equipment can allow you to arrange your workstations more efficiently, especially if you have limited space.
